

Easy Job Platform

Architecture Recommendation & Cost Analysis

Prepared by Hique Technologies

1. Executive Summary

The Easy Job platform is designed as a Tamil-first blue-collar job marketplace. This document compares the client-requested Firebase architecture with the Hique Technologies recommended scalable infrastructure, outlining technical rationale and projected cost differences across growth stages.

2. Client Stack vs Hique Recommended Stack

Layer	Client Requested Stack	Hique Recommended Stack
Frontend	Android Java/XML	Android Java/XML
Backend	Firebase Functions	Go Fiber API
Database	Firestore	PostgreSQL
OTP	Firebase OTP	MSG91
Storage	Firebase Storage	Cloudflare R2
Hosting	Firebase Managed Services	DigitalOcean / Hetzner VPS

3. Infrastructure Cost Comparison

Scale	Firebase Stack	Hique Stack	Savings
0 – 5k Users	₹10k – ₹20k	₹8k – ₹15k	15% – 30%
10k – 50k Users	₹80k – ₹2L	₹40k – ₹1L	40% – 60%
1L+ Users	₹5L – ₹10L+	₹3L – ₹5L	45% – 65%

4. Final Recommendation

Final Recommendation

For rapid MVP validation, Firebase is acceptable. However, for Tamil Nadu-wide scaling and long-term cost control, Hique Technologies recommends the Go Fiber + PostgreSQL architecture.
